
Wall Mount LIU

FR-FMS-06-SASA-WM

Frog has introduced a new value line of wall mount fiber-optic enclosures for 4F to 12F. Built with powder coated, the enclosures are designed to protect fiber-optic cabling patched in data centers or telecommunication rooms. Each enclosure fits the maximum number of industry-standard adapter panels possible in a small footprint. The design is compact and the construction is robust for easy adjustment, storage and transport.

SPECIFICATIONS:

The wall-mount enclosures have a movable top cover, for quick access to service connections. All models allow multiple openings for cable entry and exit. These are come with different combinations like with SC-APC connectors, FC-PC connectors, LC connectors etc. These are available in plastic as well as in steel body.
